Brings **Comfort** to Life!

SmartRoof bioclimatic pergola makes all the difference in the pergola systems, as it has been developed specifically to be an indispensable architectural piece to your living spaces.

Besides being durable and long lasting, SmartRoof provides heat and water insulation thanks to its water gutters and special gaskets. It prevents heat loss with polyurethane filling in panel cavities. It also provides sound insulation and reduces heating costs in the cold weathers.

SmartRoof Bioclimatic Pergola systems have integrated lightings that bring an elegant, modern and sophisticated look to the outdoor space. It makes life easier with its wide range of products with straight or inclined structures.

SELECT

Designed according to the modern architectural demands, Select makes a difference with its unique form wherever it's applied. Select is designed to adopt to any outdoor environment thanks to its unexampled features.

- Non-inclined structure does not cause any loss of height,
- It allows to open the ceiling completely with the retractable panel structure.

LIGHTING

Depending on whether you want strong practical lighting or an atmospheric dimmed ambience, be sure to make use of Byart's linear RGB alternative LED Technology. You can dim the light directly from your remote control.

FENSTER & TÜREN **VS**

Brings **Confidence** to Life!

PergoLine is an ergonomic, functional and advanced technological awning system, which can be opened and closed automatically for seasonal weather conditions.

PergoLine is made out of extruded aluminum and painted with epoxy polyester. It has a static carrying strength without needing any extra wood or steel construction.

BRONZE

The posted structure of the Bronze allows closing the side areas with VertiGlass vertical automatic glass systems or heat-insulated fixed systems. In this way, the effects of adverse weather conditions are reduced and you can enjoy an extended living space for many years to come. It's an ideal solution for private dwellings and confined spaces with its 600 cm projection.

SHELL+

Shell Plus has an oval structure that can be projected up to 1000 cm to create wide open spaces for the professional enterprises. It is resistant to all weather conditions with no need for any additional carrier. The secret that lays behind its ability to be used in a wide space without any carrier is the technology that supports it. It is appropriate to cover the side areas with folding and heat-insulated aluminum joineries. Pergola Systems use blackout fabric for protection against the sun, rain and wind. It is also flame resistant. Therefor business owners chose it for these functional solutions.

VertiGLASS
AUTOMATIC GLASS SYSTEMS

Brings **Cosy** to Life!

VertiGlass is designed and manufactured with advanced technology to transform outdoor spaces into modern architectural and aesthetic structures. It offers a harmony of luxury and functionality at its best.

Thanks to the easy installation and minimalist design, it ensures an efficient use of spaces with its vertical operation feature. And that brings an aesthetic appearance by adapting perfectly to many areas used for private or commercial purposes such as restaurants, terraces and balconies.

Byart Group offers you the perfect combination of all pergola systems for more modern and aesthetically pleasing spaces.

TRIPLEMOTION

TripleMotion glass panels are a new generation of glass system. They transform the outdoor living spaces into more convenient ones with a modern touch. TripleMotion consists of 3 modules; one third of which is a fixed parapet while the other two thirds are movable glasses. The aluminum frame feature makes it a strong structure.

- Glasses are 8 mm thick and tempered.
- Maximum Width 3000 mm.
- Maximum Height 3000 mm.
- Fully Insulated.
- 1/3 of the total height is fixed and 2/3 is movable.
- The DoubleMotion system contains a Somfy brand electric motor. It has a remote control with radio signal transmitter.
- 100% watertight.
- No lock needed for safety of wherever it's applied.
- Wide range of printable colors and logos.

DOUBLEMOTION

DoubleMotion is a durable, functional and fully insulated system developed for ease of use in living spaces. DoubleMotion is ideal for pillared structures. It is the half fixed and half movable in height. Motorized system makes each module independently controllable. Lack of an aluminum frame adds a wider appearance to the space.

- Ideal for closed areas ceilings higher than 2500 mm Applicable for areas up to 3000 mm high.
- Bottom half is fixed and the top is movable vertically.
- The movable glass is 10 mm float and tempered.
- The DoubleMotion system contains a Somfy brand electric motor. It has a remote control with radio signal transmitter.
- DoubleMotion system is insulated. Movable glass is stored next to the outer part of fixed glass
- Movable glass can be kept at any desired height. Each and every movable glass can be rapidly raised in tandem.
- 100% watertight.
- No lock needed for safety of wherever it's applied.
- Wide range of printable colors and logos.
